Software

- Photon v1.1:** <https://naturalsql.com/> Salesforce, 2020
Photon is a deep learning based cross-domain natural language interface to databases that focuses on factual look-up questions. It allows end users to query a number of relational DBs in natural language, including DBs it has never been trained on.
- Tellina v1.0:** <http://tellina.rocks/> University of Washington, 2017
Tellina is an end-user scripting assistant that can be queried via natural language. It translates a natural language sentence typed by the user into a piece of short, executable script.
