## Research Interest

I am passionate about building general intelligent systems that process information at scale and assist humans in various knowledge-intensive tasks. My recent work focuses on large-scale language modeling, language understanding and neural information retrieval.

## Experience

### Meta - Foundational AI Research (FAIR)

SENIOR RESEARCH SCIENTIST

- Research focusing on large-scale pre-training, few-shot learning and multilinguality

Menlo Park, CA, USA

Jan. 2021 - present

### Salesforce Research

SENIOR RESEARCH STAFF

- Natural language understanding research focusing on semantic parsing, natural language interface and question answering

Palo Alto, CA, USA

Jun. 2018 - Dec. 2020

RESEARCH SCIENTIST

- Natural language understanding research focusing on knowledge graph reasoning and question answering

Oct. 2017 - Jun. 2018

### Microsoft Research

## Software

---

### **Photon v1.1:** <https://naturalsql.com/>

Salesforce, 2020

Photon is a deep learning based cross-domain natural language interface to databases that focuses on factual look-up questions. It allows end users to query a number of relational DBs in natural language, including DBs it has never been trained on.

### **Tellina v1.0:** <http://tellina.rocks/>

UWCSE, 2017

Tellina is an end-user scripting assistant that can be queried via natural language. It translates a natural language sentence typed by the user into a piece of short, executable script.
